SUMMARY

Full Stack Developer with experience building scalable enterprise web and mobile applications using React, Next.js, TypeScript, Node.js, and React Native. Skilled in developing B2B procurement platforms, enterprise asset management systems, e-commerce solutions, and business management applications. Proficient in designing responsive user interfaces, integrating REST and GraphQL APIs, and delivering maintainable, high-performance solutions across the entire software development lifecycle.

EXPERIENCE

Junior Associate Developer – IOTypes Private Limited **March 2025 – Present**

- Developed and maintained enterprise-grade web and mobile applications using **React, Next.js, TypeScript, and React Native**, collaborating with cross-functional teams to translate business requirements into scalable, maintainable software solutions across multiple concurrent client projects.
- Built the **Enterprise Asset Management System** (VTrack.ai | Docs), developing features for tracking and managing organizational assets throughout their lifecycle, project/user management with role-based access control, and dynamic asset creation forms using **Next.js, TypeScript, and GraphQL**; also planned and authored the product's complete documentation site using **Nextra**, covering setup guides, features, and API usage.
- Developed **Qotbit** (Live), a B2B procurement platform connecting buyers and suppliers, implementing requirement submission workflows, quotation comparison interfaces, and end-to-end procurement process management using **React.js, Next.js, TypeScript, and REST APIs**.
- Built the **CA Management Platform** (Live), developing client management and workflow-tracking modules, dashboard interfaces for improved operational visibility, and API integrations to support business processes and reporting, using **Next.js, TypeScript, and Tailwind CSS**.
- Developed **Astin**, an e-commerce ecosystem comprising three applications – a buyer mobile app, a seller mobile app (both React Native, TypeScript, Expo, with product browsing, inventory management, and order tracking), and the **Astin Backoffice** (Live) web admin panel for centralized platform management; the mobile applications are currently in an internal early-access stage and not yet publicly released.
- Integrated **RESTful APIs and GraphQL** services across projects to enable seamless data exchange between frontend and backend systems, and built responsive, reusable UI components following modern development practices.
- Participated in code reviews, debugging, testing, and performance optimization initiatives while working within **Agile** development methodologies to ensure timely delivery of features and enhancements.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frameworks & Libraries:** React JS, Next JS, Node JS, Express.js, React Native, Expo
- **Databases:** MongoDB, SQL, Firebase
- **State Management:** Zustand, Redux Toolkit, Context API, TanStack Query
- **Styling & UI:** HTML, CSS, Tailwind CSS, Shadcn UI, Material-UI
- **Development Tools:** Git, GitHub, VS Code, Postman, OpenAPI, GraphQL Playground, Apollo Client
- **Core Expertise:** REST API Integration, GraphQL, Object-Oriented Programming, UI/UX Design, Payment Gateway Integration (Razorpay), JWT Authentication, Agile/Scrum

PROJECTS

SHOPPER – E-Commerce Platform GitHub

Technologies: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Material-UI, Razorpay

- Developed a full-stack e-commerce platform for clothing with secure authentication, product management, and

payment processing.

- Implemented features including shopping cart, coupon system, Google OAuth, wallet functionality, and Razorpay integration.
- Built comprehensive admin modules for user, product, coupon, and sales management.
- Integrated JWT authentication, Bcrypt password encryption, email OTP verification, and image uploads using Multer.

LOTUS – Online Hotel Booking Platform GitHub

Technologies: React.js, Redux Toolkit, Material-UI, Tailwind CSS, React-Slick

- Developed a responsive hotel booking platform with an intuitive user interface and seamless navigation experience.
- Implemented centralized state management using Redux Toolkit and client-side routing with React Router.
- Enhanced user engagement through interactive hotel image carousels using React-Slick.
- Designed modern, responsive interfaces leveraging Material-UI and Tailwind CSS.

EDUCATION

B.Tech in Mechanical Engineering – 74.5% **2018 – 2022**

APJ Abdul Kalam Technological University (KTU), Toc H Institute of Science and Technology, Ernakulam

Higher Secondary in Biology Science – 88.87% **2016 – 2018**

Kerala State Board, MGHSS, Edathara

SSLC – 100% **2015 – 2016**

Central Board of Secondary Education, Alameen Public School, Pathanapuram

TRAINING EXPERIENCE

MERN Stack Web Development – Brototype, Cochin **2023 – 2024**

- Completed an intensive 8-month MERN Stack training program covering MongoDB, Express.js, React.js, and Node.js through hands-on projects.
